

**THE LEAST-SQUARES COLLOCATION AND
ITS APPLICATION IN ASTROMETRY**

V. S. GUBANOV

*Institute of Applied Astronomy of the Russian
Academy of Sciences, St. Petersburg, Russia*

E-mail gubanov@isida.ipa.rssi.ru

This lecture will be dedicated to stochastic modelling of astrometric data, theoretical bases of the least-squares collocation technique and its applications in diverse field of practical investigations such as a global adjustment of observations, filtering, combining and forecasting of the Earth Orientation Parameters, comparison of catalogues and creation of reference frames.
